# KIRAN KUMAR ADAPALA

adapalakirankumar33@gmail.com 8639140079 Andhra Pradesh linkedin.com/in/adapala-kirankumar-7aa714267
github.com/Kiran8639

## Professional Summary

Python Full Stack Developer and B.Tech Computer Science (IoT) graduate with hands-on experience in developing web applications using Python, Django, HTML, CSS, and JavaScript. Skilled in REST APIs, database integration, role-based authentication, and cloud deployment using PostgreSQL, Neon, Cloudinary, and Render. Also with IoT concepts and experienced in developing IoT-based projects using ESP32 and sensors. Strong foundation in backend development and problem-solving.

## Education

**B.Tech in CSE(IOT),** *SVCET* 08/2022 – 04/2026
GPA: 8.61 Chittoor

**Intermediate / +2,** *Sri Siddartha Junior College* 07/2020 – 03/2022
GPA: 9.2 Madanapalli

**A.P Matriculation,** *Z.P High School* 06/2019 – 03/2020
GPA: 9.7 Devalacheruvu

## Technical Skills

**Languages**
Python, JavaScript

**Frontend**
HTML, CSS, Javascript

**Backend**
Django, REST APIs,Flask

**Database**
SQL plus, PostgresSql

**Tools**
Git, GitHub, VS Code, Arduino IDE

**Concepts**
OOP, Data Structures, IoT Integration

## Projects

**Smart Public Grievance Resolution System** 09/2026 – 2026
Python, Django, HTML, CSS, JavaScript, PostgreSQL (Neon), Cloudinary, Render
- Developed a full-stack Django application for citizens to register complaints, upload images, and track resolution status.
- Implemented role-based authentication for Citizens, Department Staff, and Administrators.
- Built department-wise complaint assignment and management functionality.
- Integrated Neon PostgreSQL and Cloudinary for database and image storage.
- Implemented complaint status tracking to monitor progress from submission to resolution.
- Designed a responsive user interface for seamless access across desktop and mobile devices.
- Deployed on Render and implemented Progressive Web App (PWA) functionality.

**GitHub:** https://github.com/Kiran8639/SmartPublicGrievanceSystem

**IoT-Based Remote Heart Patient Monitoring System**
ESP32, Arduino IDE, Python, HTML, CSS, JavaScript, MongoDB, ThingSpeak
- Developed an IoT-based healthcare monitoring system for real-time heart patient tracking.
- Integrated ESP32 with MAX30102, MPU6050, and DHT11 sensors to monitor heart rate, SpO2, movement, temperature, and humidity.
- Built a responsive web dashboard using HTML, CSS, JavaScript, Python, and MongoDB for live health data visualization.
- Connected ThingSpeak cloud platform and implemented emergency alert system for abnormal conditions.
- Managed hardware and website source code using GitHub.

## Internships

**Python Full Stack Development Intern,** *Datavalley India Pvt. Ltd.* 12/2025 – 03/2026
Worked on Python Full Stack concepts including frontend, backend, and database integration.

**IoT Intern,** *Elite Tech* 07/2025 – 09/2025
Worked on sensor integration and real-time IoT monitoring applications.

## Certifications

**Python Full Stack**
Datavalley; 2025-12 – 2026-03

**Python Full Stack**
SEED; 2025-09 – 2025-10

**Fundamentals of Cybersecurity**
Zscaler Training; 2026-02

**Introduction to Networking for Cyber Professionals**
Zscaler Training; 2026-02

**Quantum Fundamentals**
Amaravathi Quantum Valley, Qubitech, Wiser; 2025-12 – 2026-01

**MongoDB Essentials**
Larsen & Toubro (L&T); 2024-04 – 2024-08

**UI/UX**
Larsen & Toubro (L&T); 2023-11 – 2024-03
